

TimberKing Introduces New B2000 Sawmill

Kansas City, MO - TimberKing's new B2000 Sawmill combines all of TimberKing's latest sawmill innovations with the 80-Year TimberKing tradition of building rugged, no-nonsense equipment. The B2000 replaces TimberKing's legendary B-20 sawmill in the TimberKing product line.

"The B-20 was truly our flagship mill," says TimberKing President Will Johnson. "Over nearly 22 years, the B-20 has cut literally millions of board feet all over the world. During all that time, while the basic structure of the mill didn't change, we were constantly improving it."

Among other things TimberKing B-20 saw the introduction of the hydraulic bi-directional chain log turner, hydraulic vertical log stops and standard computer networks.

"Recently," Johnson reflects, "we found that some of the ways we wanted to make the B-20 better were limited by that basic mill structure. Luckily we didn't have to look far for inspiration. Our industrial 2200 and 2400 mills provided a template for this new mill."

Like all TimberKing mills, the B2000 features a 4-post cutting head, twin-beam welded log deck and strong company-backed warranties.

"These are the same core features that made the B-20 such a great mill for so many years" Johnson says. "That said, the B2000 builds on the B-20's legacy by providing a significantly larger cut throat, a more advanced computer set-works, and a more powerful bi-directional chain log turner."

The B2000 will make cuts up to 32" wide and features 16" clearance above the blade. It will handle logs up to 36" in diameter and 21 feet long.

"This means you can cut straight through those bigger logs," Johnson says. "And that in turn means you can do high-dollar work like wide beams and quarter-sawing that are difficult or impossible on mills with narrower throats."

The B2000 is powered with a 30HP V-Twin Gas Motor, with an available 34HP upgrade. It also has various upgrades available including diesel and electric motors, extensions, debarker and board drag-back. It carries an introductory price of \$22,495.

Like all TimberKing mills, the B2000 is backed by a Thirty-Day No-Questions Asked Money Back Guarantee, a 2 Year Limited Mechanical Warranty and a 5 Year Limited Cutting deck Warranty
