

NEW! The MLCS Fast Joint Precision Joinery System

Create Unique, Strong Joints Quickly and Easily.

MLCS Woodworking introduces the Fast Joint Precision Joinery System. This complete system comes with everything you need to create these very unique joints. It is designed to be used on your router table with an insert that allows use of bushing guide. Setting up and using this system is very easy.

Early reviews rate the system five out of five stars. And some of the feedback comments have been great.

- *"I did not expect success with the first joint I made, but I did. A perfect joint."*

- *"Excellent system, with a clear and concise manual."*

- *"The instructions and assembly were very easy to do, I being more of a woodturner, even found -this to be easy."*

This unique jointing system makes creative, custom joinery fast and simple. Insert your bit in the router, insert a guide bushing into your router table insert, set your bit height and you're ready to go. Set male and female templates on opposite sides of the jig platform and start cutting. For stock 1/4" to 3/4" thick (1/4" to 3/8" for through dovetails) and up to 14" wide. Choose from a wide variety of optional decorative and interesting joint profiles to "spice up" standard joints.

Instructions are included. It comes with a full color, step-by-step instruction booklet.

MLCSwoodworking.com has a free instructional demonstration video available as well.
